## Tech Support

Due to an increasing number of technical calls, we will now be charging a fee for technical support given over the phone. This charge will be \$15 per 15 minutes (15 minute minimum). You can purchase 1 year of unlimited technical support calls (between the hours 9:00-5:00, Mon-Fri) for \$200.

Buy before May 31

## Novell NetWare Fileserver 3.12

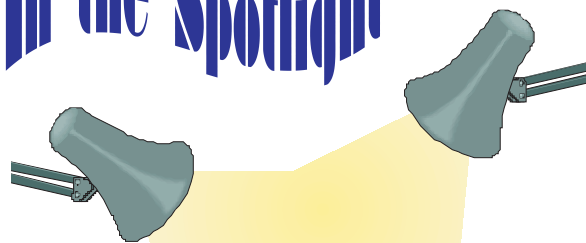

In our last issue we mentioned making sure your computer is ready for the year 2000. Anyone who is currently using a Novell NetWare Fileserver 3.12, is not ready for the year 2000. Novell has come out with NetWare 3.2 which is ready for the year 2000 and has some improved features such as faster and more efficient network performance.

## Windows '95 Tips & Tricks

Screen freezing up: when you're in an application and it stops responding, press <Ctrl><Alt><Delete> at the same time. A "Close Program" window will pop up which will give you a list of the programs you have running. Look for one that has "(Not Responding)" after it. Click once on that one (to highlight it) and then click "End Task", which will close that program and should resolve the problem.

## In the Spotlight

## Spring Cleaning

Have you done your spring cleaning yet? If so, your office may not be completely clean if you didn't have your computer cleaned. If you haven't had your computer cleaned since last spring, or you can't remember the last time you had it cleaned, it's time to call us. When dust builds up on your computer it can cause the components to over heat, blocks the fans that cool off the computer, and may cause the drives to fail. For \$49.95 we'll clean and dust your computer, inside and out to keep it running smoothly. Also included in this price is a year 2000 test, to check all of your software for year 2000 compatibility.

If you have multiple computers you need cleaned, call for a discount.

## CD Writing

Do you have any archives you'd like together on one CD? Music on tape that you'd like on CD? We can do it! Bring in any music on tape, information from your computer or off disks and already existing CDs and we'll make you a CD. No more wishing everything was on one disk or wishing you could put your favorite songs from tape to CD. We can do it quickly for you!

Call us for more information.
